

Index

Note: Page numbers of article titles are in **boldface**.

A

- Abductor digiti minimi muscles, testing of, 196
- Abductor hallucis muscle, testing of, 196
- Achilles reflex, testing of, 196
- Anterior compartment
 - fasciotomy of, 226–227
 - pressure measurement in, 223
- Arthroplasty, first metatarsophalangeal joint, osseous pathology after, **293–297**
- Association of Extremity Nerve Surgeons, 192
- AxoGuard Nerve Protector, for capping intermetatarsal stump neuroma, **235–242**

B

- Biopsy, for small fiber neuropathy, **185–189**
- Brand, Paul Wilson, 204–208
- Burning sensation, in small fiber neuropathy, **185–189**

C

- Calcaneal nerve, vibration testing of, 199
- Carpal tunnel decompression, for leprosy neuropathy, 207–214
- Chronic exertional compartment syndrome, **219–233**
 - anatomy of, 222
 - clinical examination in, 222
 - differential diagnosis of, 220–221
 - etiology of, 221–222
 - fasciotomy for, 226–231
 - pathophysiology of, 219
 - postoperative phase of, 231–232
 - testing for, 222–226
 - versus acute exertional compartment syndrome, 219
- Clinical examination, 193
- Cochrane, Robert Greenhill, 204–205
- Common fibular nerve
 - compression of, **283–291**
 - anatomic considerations in, 284–285
 - causes of, 286
 - clinical examination for, 286–287
 - decompression for, 287–290
 - history of, 283–284
 - symptoms of, 285–286

Common (*continued*)

- intraoperative monitoring at, 258–263
- Common peroneal nerve, entrapment of, after failed first metatarsophalangeal joint arthroplasty, **293–297**
- Compartment syndrome, chronic exertional, **219–233**
- Computed tomography, for chronic exertional compartment syndrome, 226
- Cornblath critique, of nerve decompression hypothesis, 274
- Cubital tunnel decompression, for leprous neuropathy, 207–214

D

- Dapsone, for leprosy, 204
- Decompression surgery
 - for diabetic symmetric peripheral neuropathy, 270–277
 - for leprous neuropathy
 - history of, 207–208
 - new conceptual approach to, 208–215
 - for superficial fibular nerve entrapment, 249–253
 - intraoperative monitoring during, **255–266**
- Deep posterior compartment
 - fasciotomy of, 228–231
 - pressure measurement in, 224
- Deep tendon reflexes, evaluation of, 194, 197
- Dellon, Leon, nerve decompression hypothesis of, 271–273
- Diabetic neuropathy. *See also* Diabetic symmetric peripheral neuropathy.
 - common fibular nerve decompression for, 285–286
 - nerve surgery for, 209
- Diabetic Neuropathy Nerve Decompression (DNND) Study, 275
- Diabetic symmetric peripheral neuropathy, **267–282**
 - complications of, 268
 - economic aspects of, 277
 - economics of, 270
 - pathogenesis of, 268
 - statistics on, 267–268
 - treatment of, 268–269
 - ulceration recurrence in, 270
- DNND (Diabetic Neuropathy Nerve Decompression) Study, 275
- Drop foot, common fibular nerve decompression for, 283–284
- DSPN. *See* Diabetic symmetric peripheral neuropathy.

E

- Elbow, nerve decompression at, 207–214
- Electrodes, for intraoperative monitoring, 258–263
- Entrapment, superficial fibular nerve. *See* Superficial fibular nerve injuries and entrapment.
- Exercise, chronic exertional compartment syndrome in, **219–233**
- Extensor digitorum longus muscle, testing of, 195
- Extensor hallucis longus muscle, testing of, 195
- Exertional compartment syndrome, chronic, **219–233**
- Extracellular matrix material, for capping intermetatarsal stump neuroma, **235–242**

F

Fasciotomy, for chronic exertional compartment syndrome, 226–231

Father Damien House, 212–215

Fibular nerve

common, compression of, **283–291**

vibration testing of, 199

Fibular nerve injuries and entrapment. *See* Superficial fibular nerve injuries and entrapment.

First metatarsophalangeal joint arthroplasty, osseous pathology after, **293–297**

Flexor digitorum longus muscle, testing of, 196

G

Gait testing, 201, 287

Gastrocnemius muscle, testing of, 196

Genetic factors, in chronic exertional compartment syndrome, 221

H

Hamstring muscles, testing of, 195

Hansen, Gerhard Arnauer, 204

Hip muscles, testing of, 195

Hockey stick-shaped probe, for intraoperative monitoring, 262–263

I

Intermediate dorsal cutaneous nerve, protection of, in surgery, 246

Intermetatarsal neuroma, stump, processed porcine extracellular matrix material capping for, **235–242**

Intraepidermal nerve endings, abnormal, in small fiber neuropathy, **185–189**

Intraoperative monitoring, during decompression surgery, **255–266**

advantages of, 255–258

procedure for, 258–263

Intrinsic muscles, testing of, 196

L

Lateral compartment

fasciotomy of, 226–228

pressure measurement in, 223–224

Lateral plantar nerve, neurolysis of, after failed first metatarsophalangeal joint arthroplasty, **293–297**

Length-dependent axonopathy, 268

Leprous neuropathy, 203–217

drug ineffective in, 206–207

historical view of, 203–207

peripheral nerve surgery for

history of, 207–208

new conceptual approach to, 208–215

Lower Extremity Amputation Prevention, 268

M

Magnetic resonance imaging

- for chronic exertional compartment syndrome, 226
- for superficial fibular nerve entrapment evaluation, 248

Manual muscle testing, 193–196

Manual nerve percussion test, 200–201

Medial dorsal cutaneous nerve, protection of, in surgery, 246

Medial plantar nerve, neurolysis of, after failed first metatarsophalangeal joint arthroplasty, **293–297**

Median nerve

- leprosy affecting, 205, 207–214
- vibration testing of, 199

Monitoring, during decompression surgery, **255–266**

Motor examination, 193–194

Muscle herniation, superficial fibular nerve entrapment in, 245

Mycobacterium leprae infections. See Leprous neuropathy.**N**

National Leprosarium of the United States, Carville, Louisiana, 207

Nerve blockade, for superficial fibular nerve entrapment evaluation, 248–249

Nerve percussion test, 200–201

Nerve-related injuries

- chronic exertional compartment syndrome, **219–233**
- decompression surgery for. See Decompression surgery.
- in diabetic neuropathy, **267–282**
- intermetatarsal neuromas in, **235–242**
- leprosy neuropathy, **203–217**
- neurologic examination for, **191–202**
- of common fibular nerve, **283–291**
- of superficial fibular nerve, **243–254**
- osseous pathology in, **293–297**
- small fiber neuropathy, **185–189**

Neurectomy, for superficial fibular nerve entrapment, 249–253

Neurologic examination, **191–202**

- clinical, 193
- deep tendon reflexes, 194, 197
- for common fibular nerve compression, 287
- motor, 193–194
- sensory, 197–202

Neurolysis

- for leprosy neuropathy
 - history of, 207–208
 - new conceptual approach to, 208–215
- for multiple nerves, after failed first metatarsophalangeal joint arthroplasty, **293–297**
- for superficial fibular nerve entrapment, 249–253

Neuromas

- of multiple nerves, after failed first metatarsophalangeal joint arthroplasty, **293–297**
- stump, intermetatarsal, processed porcine extracellular matrix material capping for, **235–242**

NIM 3.0 Nerve Monitoring System, 258–263

Numbness

in chronic exertional compartment syndrome, 220

in small fiber neuropathy, **185–189**

O

Osseous pathology, after first metatarsophalangeal joint arthroplasty, **293–297**

P

Pain, in small fiber neuropathy, **185–189**

Patellar reflex, testing of, 196

Percussion test, nerve, 200–201

Peroneal nerve, decompression of, for leprous neuropathy, 212

Peroneus brevis muscle, testing of, 195–196

Pinprick test, for superficial fibular nerve entrapment, 245

Plantar nerve, vibration testing of, 199

Porcine extracellular matrix material, for capping intermetatarsal stump neuroma, **235–242**

Position sense, testing for, 201

Pressure Specified Sensory Device, for superficial fibular nerve entrapment, 245, 249

Processed porcine extracellular matrix material, for capping intermetatarsal stump neuroma, **235–242**

Proprioception, testing for, 201

Q

Quadriceps muscles, testing of, 195

Queens Square Hammer, for reflex testing, 197

R

Radial nerve, decompression of, for leprous neuropathy, 212

Raymond M. Curtis Hand Center, 206

Reflexes, testing of, 194, 197

S

Sensory examination, 197–202

Sharp and dull discrimination, in sensory examination, 197

Sherrington, Charles Scott, 205

Skin biopsy, for small fiber neuropathy, **185–189**

Small fiber neuropathy, **185–189**

Soleal sling, intraoperative monitoring at, 258–263

Stimulating probes, for intraoperative monitoring, 260–263

Straight leg test, 201

Strength testing, 193–196

Stryker Intra-Compartmental Pressure Monitor System, 222

Stryker Quick Pressure Monitor Set, 222

Stump neuroma, intermetatarsal, processed porcine extracellular matrix material capping for, **235–242**

- Superficial fibular nerve injuries and entrapment, **243–254**
 - anatomic considerations in, 245–246
 - decompression of, 249–253
 - diagnosis of, 246–249
- Superficial posterior compartment
 - fasciotomy of, 228–231
 - pressure measurement in, 224

T

- Tarsal tunnel, intraoperative monitoring at, 258–263
- Temperature testing, 201
- Temporary neurogenic claudication, 232
- Tibial nerve
 - decompression of, for leprosy neuropathy, 212
 - neurolysis of, after failed first metatarsophalangeal joint arthroplasty, **293–297**
- Tibialis anterior muscles, testing of, 195
- Tibialis posterior muscle, testing of, 196
- Tinel sign, 201, 248
- Tuning fork, for vibratory perception testing, 197–199
- Two-point discrimination test, 197, 245

U

- Ulnar nerve, leprosy affecting, 205, 207–214
- Ultrasonography, for superficial fibular nerve entrapment, 248

V

- Vibratory perception, testing of, 197–199

W

- Whartenberg wheel, 197
